Car Mark, It Is Believed.

For the Oil Which it is Shipping to The Rest Belong to the University, the England-Annual Election of the Oil Exchange Takes Place Soon.

sent, rexas, April 26.—The steamer Cardium is now located on the outside and ready to clear for England and will add another good supply to the fuel oil on the soil of the mother country. The number of barrels in the cargo will be 56,000.

An interesting fact was developed in the first shipment of oil by that boat to England in that the price sworn to before the government leustom house officcers was 31 Since then it is gencents per barrel. erally understood that the price has been Increased and if that is the case an idea of what the Guffer people are getting for their product may be determined. It has been stated by some of the employes here, who are not with the company now, howeverthat the company receives 50 cents per barrel for the oil on board the yearel and then gets half of the profits over that It is, of course, well known that they sell to the Shell Transporting and Trading company and this would mean a pretty fair price for the oil. It is true that it is described but that is a matter of small extence company it to the cost of regularly reduced oil.

At our rate it is certainly a fact that the Guffey Petroleum company gets more than 20 cents per barrel for its product, and that is, or should be, a greater factor in browing up the price from its fraction in browing up the price from its fractionally low fig.

There is no longer any doubt about the oil shipments for the month passing the 5000-car mark, for the shipment of the Cardium assures that beyond any question and means that April will be the targest ing to the Enterprise the shipments up to toutsit run to \$200 cars and the Cardinia shipment alone will increase the list 1520 cars, while there is yet deciderable time for the remaining 500 cars to make the total pass the limit that has been watcaed so closely during the latter part of the month. The fact that the demand keeps up to the facilities for shipping and that every time or and every years that cits the A great many people thought that when a large addition was made to the number of tank cars in service here and the vessels were secured for the trade the demand would not keep up, but they have reckned newbade.

The Begument oil exchange is getting ready for the annual meeting and the election of a new hoard of directors and officers. It does not seem like a year to the people here who were prominent in the or ganization of the fastitution which has devoived into a most flourishing and beneficial organization for and of the city. The company-for it is a chartered institution ecompany—for it is a chartered institution— has been the means through the secretary, Mr. Childress, of bringing many destrable enterprises to Heaumout besides bringing a great many influential business men here who do not coust for as much when taken lingly, but who ran up in figures as to means, as well as in numbers as to pop-mistion.

The Penman Tank company today anpounced that it will start the Begumont plant on July 1 if the present calculations materialize and there is every reason to think that they will. A large number of men are kept constantly at work on the plant and the adjacent houses to be used in consection with the plant. Ther will
